

BECURI ECONOMICE

Prezentare generala:

Becuri economice integrate:

- Sunt destinate numeroaselor aplicatii de iluminat interior si se potrivesc perfect in aceleasi socluri cu becurile echivalente cu filament.
- Au un consum redus de energie cu pana la 80 % fata de becurile cu incandescenta, pentru aceiasi cantitate de lumina.
- Au o pornire aproape instantanee, fara efecte de scanteiere (< 1s) si ajung la luminozitate maxima dupa un minut de la aprindere.
- Durata medie de viata este de 6 sau 8 ori mai lunga fata de becurile cu incandescenta, ajungand pana la 6000 h, respectiv 8000 h.
- Becul contine un balast electronic.
- Pentru iluminatul in exterior, becul necesita corpuri de iluminat cu grad de protectie minim IP54.
- Sunt incompatibile cu variatoare, intreruptoare cu led si cu intrerupatoare electronice.

Becuri economice nonintegrate :

- Se monteaza intr-un corp de iluminat care contine balast.
- Nu contin balast electronic incorporat.
- Balastul trebuie sa aiba aceiasi putere ca sursa economica.
- Becul contine starter si condensator.
- Potrivite pentru instalare in panouri luminoase si pe coridoare.

Caracteristici tehnice:

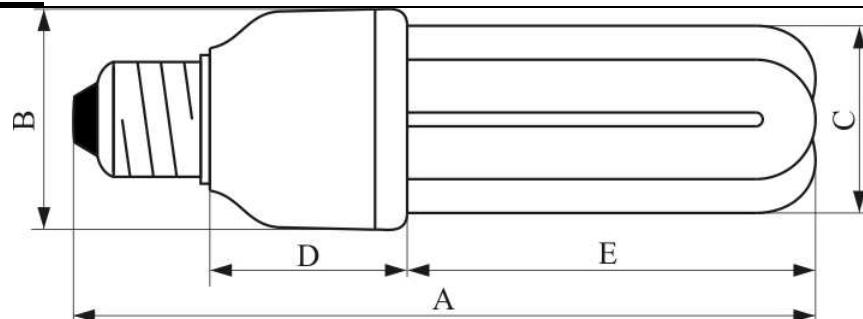

Standard	EN 55015; EN 61195; EN 61547; EN 61000
Tensiune nominala	230 V ca
Culoarea luminii	Lumina alba calda (2700 K) Lumina rece naturala (6400 K)
Clasa energetica	A
Temperatura de lucru	-10 - +40 °C

Instructiuni de montaj:

La montare este intersiza prinderea becului economic de tuburi.

Becurile vor fi prinse de soclu si rotite in dulie.

Intretinerea minima recomandata, consta in curatirea lunara de praf a becului cu carpa moale. Curatirea de praf a becului se face cand becul nu este aprins.

Instructiuni de ambalare:

Produsele sunt ambalate individual in cutii din carton, pe care sunt aplicate etichete de identificare.

Instructiuni de transport:

Transportul, manipularea si depozitarea se va face fara deteriorarea ambalajului si a continutului.

Deasupra cutiilor nu se aseaza obiecte grele, deoarece pot fi distruse.

Cutiile trebuie pozitionate, astfel incat in timpul transportului sa nu se deplaseze.

Nu se aseaza langa corperi dure sau ascutite, care pot distruge produsul in timpul transportului.

Instructiuni de manipulare:

Se pot aseza pe un palet, pentru mutarea mai multor cutii, de catre mijloace speciale de manipulare.

Instructiuni de depozitare:

Spatiul de depozitare trebuie sa fie inchis, uscat, cu temperaturi cuprinse intre -20°C si +50°C, fara praf si intr-un mediu lipsit de substante active chimic.

Nu este permisa depozitarea pe termen lung, in locuri expuse la actiunea razelor solare.
